SF503UL

SF504UL

RP500K

Patient Pendant Transmitters - OEM

These pendant transmitters, built with a waterproof package, may be worn in the shower or bathtub, outside in the rain or temporarily submerged. The pendants have a single button design with "press and one-second hold" activation, making them easy to use but resistant to false alarms. When pendant is activated, it vibrates briefly and the red LED blinks until alarm is cleared. Alarms may be cleared by placing the RP500K alarm clearance card over the button or by a sequence of button presses. The pendants feature a fully supervised RF link and built-in LED flashes with all transmissions, including supervision. The battery is a replaceable 3 V lithium-metal.

- **For use with Tek-CARE 500 Wireless Emergency Call System**
- **Low battery warning before battery depletion**
- **Neck lanyard & wristband options**
- **UL® 2560 Listed**

UL LISTED

LED Corridor Zone Light – OEM

The LI382LED Corridor Zone Light provides visual indication of calls when used with a nurse call system, emergency call system, or similar application. Indicates an emergency call by the rapid flashing of the two red LED bulbs associated with the zone or area from which an emergency call has been placed. Normal calls are indicated by a steady illumination of the two white LEDs. If an emergency or normal call are placed in the same zone at the same time, the red LEDs connected to the emergency station will flash rapidly, while the white LEDs associated with the normal call will maintain a steady illumination.

- **For use with Tek-CARE 500 Wireless Emergency Call System**
- **Long lasting LEDs & no bulb replacement needed**
- **Plug-in connector supplied**
- **Attractive flame-retardant plastic panel**
- **Standard mounting plate for 1-gang or 2-gang mounting options**
