

## Breathing is mandatory™

### **NEW** Dechoker Choking First Aid Device

This choking relief device is used during a choking emergency. Using powerful suction, the Dechoker removes fluid and the obstruction from the airway. This single-use device can be stored in existing first aid cabinets or can be purchased with a wall-hanging metal cabinet. With image-printed and worded instructions applied to the device, this easy-pull operation design is simple for nearly any person to administer.

- **Registered as an FDA Class I & II medical device**
- **Adult-sized unit is designed for ages 12 & over**
- **Metal cabinet option includes 1 adult-sized Dechoker, 2 pairs of non-latex powder free gloves, 1 hand sanitizer wipe, 1 soap towelette, 1 non adherent pad (2" x 3"), 2 fabric adhesive bandages (1" x 3") & 1 CPR face shield**
