

## MEDICAL VERTICAL

TG3 engineers have designed these keyboards to handle the harsh and demanding environments that the medical field brings every day.

### LOW PROFILE

The medical keyboards come in black or white. They are low profile and have sleek chicklet style keys.

### CLEANABLE

These fully sealed keyboards are waterproof and dust proof. They have been tested against and can withstand medical grade cleaners.

### BLUETOOTH

The keyboards have a wireless option that is Bluetooth enabled. This is a new feature TG3 just recently introduced to the market.

### BACKLIGHT

Backlight options are available for any of the medical keyboards. Black keyboards have white backlight and white keyboards have green backlight.

## PRODUCT SKUS

There are over 60 different keyboard SKUs to choose from in TG3's medical product line. These products range from keyboard size and color, backlight options, pointing device options, etc.

## MOUNTABLE

The bottom of the keyboard contains VESA pems for attaching on medical carts to provide increased security on medical equipment.

## EASY TO TYPE

These keyboards have scissor switch technology which means they have mechanical keys that are designed for comfort and efficient typing, even when wearing medical gloves.
