Don't Forget Your  
Jumper Cable!

## ProTVSolutions Pillow Speaker Interface

The ProTVSolutions Pillow Speaker Interface (PSI) solution allows you to use digital pillow speakers with cable or satellite set-top boxes. Simply connect the PSI to the back of your hospital grade TV or cable/satellite set-top box. In most cases you can continue using your current pillow speakers. Unit requires two jumper cables with 1/8" 3-conductor headphone plugs; sold separately.

- Integrate digital pillow speakers with a cable/satellite set-top box
- Compatible with Crest Elite digital pillow speakers & other major brands
- External power supply not required
