

Fall Fighter® - Fall Management

Fall Management Matters

Fall management is a major concern throughout the healthcare field. Fall Fighter, available exclusively from Crest Healthcare, offers facilities a comprehensive fall prevention solution. Implementing Fall Fighter will assist your facility in reducing the occurrence and frequency of resident falls.

Resident Falls

A continuing risk with high cost

Fall prevention in senior living facilities continues to be a major focus for quality improvement in patient safety. Studies confirm as many as 75% of nursing home residents fall annually, with a significant percentage experiencing serious injury.

Elderly individuals fall at an average rate of 2.6 falls per person per year. Falls result in disability, functional decline, reduced quality of life and even death. Also, fear of falling can cause further loss of function, depression, feelings of helplessness and social isolation. Falls resulting in hospitalization cost an average of \$30,000.

"It's so demoralizing when a resident falls - for the staff, families and the resident themselves...It can cause any number of injuries for a person, so we take it very seriously."

- Anne, R.N., Assistant Director of Nursing
