

# Aurora Handheld Portable UVC Disinfection Device

## Overview

The Aurora from SMS Technologies is the most powerful handheld, portable UVC disinfection device on the market. It is designed to deactivate viruses, bacteria, and fungi in the quickest, most effective way possible. This lightweight design makes disinfecting the high touch and hard to clean surfaces easier than ever. This device is perfect for disinfection in the following areas:

- Hospitals
- Ambulatory Surgery Centers
- Senior Living Communities
- Clinics
- Ambulances

## Benefits

- Delivers  $>10,000\mu\text{W}/\text{cm}^2$  at 8"
- The powerful design deactivates most common viruses and bacteria in around one second of exposure
- Mobile design allows for disinfection on all surfaces of an object
- Lightweight
- Very easy to use
